Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02/07/2005.
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Levin et al (U.S. Patent 6,154,201).

Levin et al teach:

Claim 1: A manual input device comprising: an actuator laterally movably fitted to a frame (Fig. 3A: 70; Col. 9:57: 60); a manual control knob fitted to a driving shaft of the actuator (Fig. 3A: 18; Col. 2:1-5), the knob swingably manipulated (e.g. Col. 5: 42-45); a first position sensor which detects a direction and an amount of lateral movement of the actuator (Col. 1:66-2:1; Col. 2:30-32), the amount of lateral movement of the actuator being detected at multiple locations along the same direction (e.g. Col. 14:28-67, P1

and P2; Col. 15: 23-48, P1-P4); a second position sensor (e.g. Fig. 4C: 76) which detects a directions and an amount of rotation of the driving shaft of the actuator (Col. 1: 65-66); and a controller which inputs positional signals outputted from the first and second position sensors to control the actuator (Col. 2: 10-15) and applies an external force to the manual control knob according to the way the knob is manipulated (Col. 2: 47-50).

Claim 3: the driving shaft (e.g. Fig. 3A: 50) of the actuator (e.g. Fig. 3A: 70) passes through a guide groove (e.g. Fig. 3A: 52) and the guide groove (e.g. Fig. 3A 52) restricts a direction and amount of lateral movement (e.g. Col. 8:40-45).

Allowable Subject Matter

3. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed 07 February 2005 have been fully considered but they are not persuasive. In response to applicant's argument that Levin et al do not teach a swingable actuator, applicant's disclosure does not distinguish "swingable" from "rotated". Referring Webster's New Collegiate Dictionary, a definition of "swing" is "to turn in place". There is nothing in applicant's claim language that precludes the examiner from reading Levin et al as meeting the claimed limitation of "swingably".

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
